<b>Item#</b>	

### A. UTILITY PEEL

Move or rotate any size pizza with nearly surgical precision using Wood Stone's utility peel. The 8-inch diameter utility peel is also very useful for moving pans, placing wood on the fire and removing ash. This is such a useful tool that most people order two.

*\*\*A lighter, Titanium version of the Utility Peel is also available.\*\**

### B. LARGE PEEL

The head of this 13.5-inch diameter peel is made of a thinner-gauge metal than our utility peel. This peel makes it easy to transfer pizza from the prep table to the oven. It is also very handy for placing loaves of bread on the hearth.

### C. FLOOR BRUSH SET

The floor brush is a vital tool for efficient oven operation. The heavy-duty, brass-bristled, wooden head is beveled to facilitate debris removal from all corners of the oven. The floor brush is available in two styles; "T" style and the "in-line" style. Extra 10" brush heads are available. Although, more susceptible to heat damage than our brass bristled brushes, we find this large, natural fiber brush to be indispensable.

### D. ASH SHOVEL

Our heavy gauge stainless steel shovel is designed to safely remove ash and coals from wood-fired ovens. Its front is beveled to remove ash from even hard to reach parts of the oven.

### E. LONG-HANDLED WOK

Wood Stone's long-handled wok is a show-stopping addition to any solid fuel cooking operation. It features a mild steel wok on a heavy gauge stainless steel handle.

### F. BUBBLE HOOK

The bubble hook is for popping pizza dough bubbles before they get out of hand. Made from heavy gauge stainless steel, it is also great for moving pans, trays and even wood.
